

Engineering And Technical Services Directorate (D)

Provides a full range of integrated services including engineering, fabrication, testing and facility management for NASA, industry, and the Glenn community. We provide these services in a timely, safe, and cost-competitive manner to meet customer needs in an environment that ensures success through empowerment, diversity, and teamwork. We are a highly skilled, multidisciplined, diverse team recognized and sought after by customers and stakeholders as a vital partner in advancing the mission of the nation's aero and space programs.
